Opinion Poll

Prepared for

**THE SUNDAY TIMES**

Prepared by Ian McShane

# Technical Appendix

# Technical Appendix

- The results of this opinion poll are based upon a representative sample of 921 eligible Irish voters aged 18 years +.
- As such, the results can be deemed to be accurate to within plus or minus 3.3 percentage points at the 95% confidence level. Fieldwork was conducted on an in-home, face-to-face basis over the period 27<sup>th</sup> April –9<sup>th</sup> May, 2017.
- The sample was stratified across all constituencies at 125 locations in the country with individuals selected for interview by way of Demographic Quotas (age, gender, socio-economic status) in line with Central Statistics Office (CSO) and market research industry population estimates.

# Technical Appendix

- The subsequent survey results are weighted to reflect the known demographic profile of Irish adults, utilising the most recently published census population estimates from the Central Statistics Office (CSO).
- Party support levels are subsequently realigned in accordance with a technical adjustment factor, designed to smooth the effects of extreme highs and lows in support levels for individual parties as measured at a single point in time, and taking variable election day turnout levels into account.
- All aspects of the survey, including the Party Support adjustment factor, are implemented in accordance with the technical and ethical guidelines set down by the Association of Irish Market Research Organisations (AIMRO) and the European Society of Opinion & Market Research (ESOMAR).

# Party Support Adjustment Factor: Technical Note

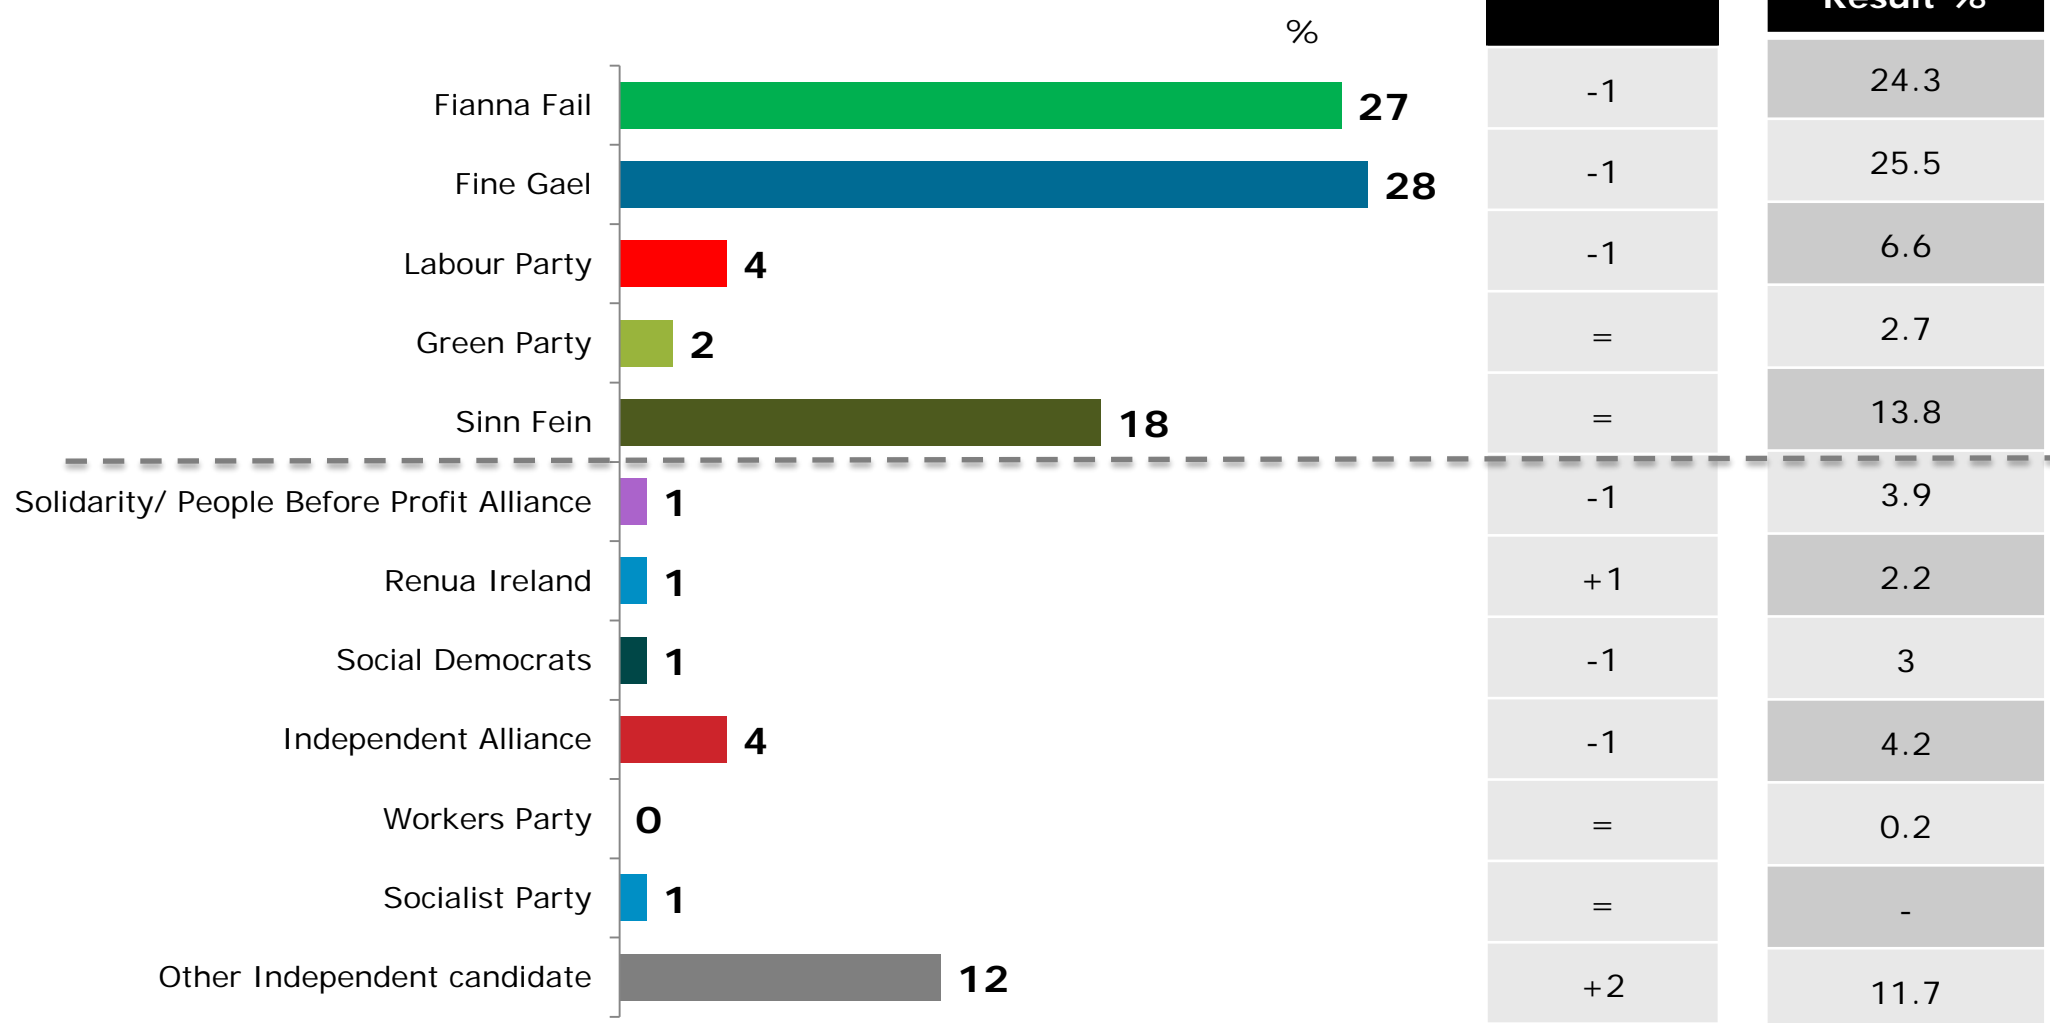

- Predicting election results on the basis of poll data is not an exact science. All the evidence shows that support for individual parties can swing dramatically in the period between elections- very often outside the bounds of historic election results.
- What to do in these circumstances? Most polling companies in Britain and Ireland publish their raw survey results as an index of fluctuations in the emotional mood of voters. They also build in an adjustment based on a number of factors. Where we have reports of how people voted in the last general election as well as how they intend to vote in the next one we can use these data to model the likely level of swing from the last election results.
- We then add back in the forecasts of voters who have not voted last time or do not answer that particular question.
- Finally we take into account each individuals stated likelihood of voting in a forthcoming General Election.
- This is the basis of the adjusted voting forecast in Behaviour & Attitudes polls.

# Commentary

# Sunday Times/Behaviour & Attitudes Opinion Poll Series

## Background

Fieldwork for today's poll was conducted over the period Thursday 27<sup>th</sup> April – Tuesday, 9<sup>th</sup> May, 2017.

Domestic issues dominating the media over this period included a number of reports which highlighted the chronic shortage of housing supply across the country, compounded by ever spiralling rent levels.

Despite a range of Government and Central Bank initiatives designed to alleviate the housing crisis, the situation appears to the average citizen to be out of control, with no medium or even long term practical solutions in sight.

Meanwhile the Government, and Minister for Health Simon Harris in particular, seemed to be taken off-guard by the intensity of public reaction to the ownership of the new National Maternity Hospital by the Catholic Sisters of Charity order.

Despite numerous assurances that the hospital will in effect be managed at arm's length from the religious order, people seemed to find it hard to accept at an emotional level, given the track record of the Catholic Church in Ireland regarding women and children's rights.

## Background

To some, the Government's mishandling of the situation was symptomatic of a broader sense of the Government administering rather than governing the country.

On the international stage, there had been much coverage of the triggering of article 50 by the British Prime Minister, and the likely effect of Brexit on the Irish economy, the North/South border, and even the potential for a reunification of the country.

Notwithstanding all of the aforementioned potentially unsettling themes, a raft of financial reports continued to point to a growing and expanding Irish economy, and a workforce dynamic which suggests full employment in the not too distant future!

## Party Support and Leader Satisfaction Levels

Last month's Behaviour & Attitudes/Sunday Times poll produced what we posited may have been a Fine Gael pre-leadership change bounce, with support for that party increasing by seven percentage points month-on-month, positioning it ahead of Fianna Fáil as the most popular party in the country.

As fieldwork for today's poll progressed, there was still no definitive indication from Enda Kenny as to when exactly he will step down as Fine Gael leader and Taoiseach. Not to be deterred, both Leo Varadkar and Simon Coveney had begun to ramp up their leadership election campaigns amongst members of the parliamentary party, and grassroots members across the country.

At a personal level, significantly more voters have been dissatisfied with Enda Kenny's performance as Taoiseach than have been satisfied for the best part of the last three years.

For example, in today's poll 34% of the Electorate say they are satisfied with Kenny, 55% dissatisfied, with a remaining 11% undecided.

These personal satisfaction ratings are practically identical to those registered last month. When we look at the figures a little more closely, it emerges that the vast majority of core Fine Gael supporters (77%) are satisfied with Mr Kenny as Taoiseach, a figure which has remained rock solid amongst the party faithful for many years now. Based on these figures alone, it would appear that the perceived need for Kenny's removal is very much an internal, rather than an external Fianna Gael party phenomenon.

## Party Support and Leader Satisfaction Levels

At a party support level, support for Fine Gael remains high this month at 28% - essentially the same as it was last month. Support for the main Government party has actually dipped by four or five percentage points amongst those aged under 54 years of age, but has correspondingly improved by the same margin in the older (55 years plus) age cohort, as well as across rural areas.

All in all, Fianna Fáil has thus far struck quite a masterful balance between propping up the Government on the one hand, and criticising and distancing themselves from the vast majority of Government decisions, on the other.

Examples include Fianna Fáil's repeatedly stated lack of confidence in Nóirín O'Sullivan as Garda Commissioner, and relentless criticism of Government Housing policy, the ownership of the National Maternity Hospital, etc.

Over the last ten consecutive Behaviour & Attitudes/Sunday Times Polls, Fianna Fáil support has averaged out at 29%. Support for the party reached a peak of 32% in February, and has dipped somewhat over the last three polls to the 27% registered today.

This trend would suggest that there may be a natural ceiling of in or around 30% for the party.

Unless Fianna Fáil is prepared to enter a coalition with Sinn Féin, the most likely post-election scenario is therefore still a toss up between a Fianna Fáil and Fine Gael led Administration, and likely a minority one at that.

## Party Support and Leader Satisfaction Levels

As it seeks to maximise its share of the vote over the coming months, Fianna Fáil might note that its support in May has declined quite significantly amongst older, rural and C2DE (primarily blue collar workers and those reliant on social welfare) voters.

With the economy continuing to improve, and a newly invigorated Fine Gael party looming once its next leader is elected, the temptation for Fianna Fáil to pull the Government down will surely only increase over the coming months, with a general election any time between this Autumn and next Spring a distinct possibility.

Support for Sinn Féin has been stagnating of late, and has been sitting on 18% for the last two months. While Sinn Féin has tended to under perform in actual elections vis a vis its opinion poll ratings, the final B&A poll conducted before last year's General Election produced a 15% support level for Sinn Féin – just marginally higher than the 14% the party actually achieved.

Certainly, if that party could capture 18% of the vote in the General Election it would push its number of TDs close to the 30 seat mark, rendering it even more difficult for either Fianna Fáil or Fine Gael to form a majority Government.

## Fine Gael Leader and Abortion Preferences

When asked to identify at a spontaneous level who they would prefer to see as the new Fine Gael leader, 25% of the Electorate proposed Leo Varadkar, with 20% opting for Simon Coveney.

A further 9% indicated they would like to see Richard Bruton as Fine Gael leader, followed by 5% nominating Francis Fitzgerald, 3% Simon Harris, and 2% other, unidentified individuals.

Just over one third (35%) volunteered no opinion at this question.

The levels of support for Varadkar and Coveney are almost identical to those measured in last month's poll, with a more detailed review of the data revealing that support for the former peaks amongst ABC1 white collar and professional workers, as well as in the Greater Dublin Area.

Simon Coveney's support is correspondingly higher amongst those aged over 55 years, and resident in the Munster and Connaught/Ulster regions.

The 5% advantage enjoyed by Leo Varadkar over Simon Coveney at an overall national level is actually reversed when we focus in on core Fine Gael supporters. Thus, we see that 33% of potential Fine Gael voters would like to see Simon Coveney as the new party leader, compared to 28% opting for Leo Varadkar.

## Fine Gael Leader and Abortion Preferences

The Citizens Assembly recently met and voted upon a number of scenarios related to abortion in Ireland. There was some surprise at the quite high levels of support for the introduction of abortion to Ireland under some of those scenarios.

A number of the same scenarios was tested amongst the General Electorate in today's poll, and the results confirm that circa three quarters of all voters believe that abortion should be permitted in Ireland in cases of foetal abnormality, rape, and where the Mother's health could be damaged by the pregnancy.

There is, however, strong opposition to abortion being permitted for socio-economic reasons (for example, where the Mother or parents would have difficulty in supporting the child financially). When presented with this potential scenario, just three in ten feel that abortion should be permitted in such cases, while 58% believe it should not.

There is even stronger opposition to abortion being permitted in Ireland without any restrictions as to the reason for that abortion.

Just 29% of the Electorate believe that abortion should be permitted in such unrestricted a fashion, 61% are actively opposed to it, with the remaining 10% uncertain.

As you probably know, the Citizens Assembly recently met and voted upon a number of scenarios related to abortion in Ireland. We would like you to consider a number of the options that the assembly voted on. Specifically ....

Q.9a Do you believe that abortion should or should not be permitted in Ireland in cases where the unborn child has a foetal abnormality likely to result in death before or shortly after birth?

Q.9b Do you believe that abortion should or should not be permitted in Ireland in cases where the pregnancy is the result of rape?
